

Homework 7

Due July 27

Your assignment is to write a final exam. Come up with 20 questions that you think would be worthy of appearing on your final, and solve 10 of them. I expect there to be variety, i.e. don't make all your questions from the same chapter. You can of course complete this assignment with minimal effort, but I believe the more thought you put into this will only help as preparation for taking the final.
