

Calculus I

MATH 130S-COX

June 17-July 19, 2013

Important Information:	
Instructor: Chris Cox Office: Cupples I 203 Time: MTWThF 1:00-2:45 Email: ccox@math.wustl.edu Course Website: http://math.wustl.edu/~ccox/130s.html	
Text: <i>University Calculus</i> , (Early Transcendentals/Single Variable) Hass, Weir, & Thomas, 2nd Edition.	
Important Dates:	
Wednesday, July 3	Midterm
Thursday, July 4	No Class
Friday, July 19	Final Exam
How your grade is determined:	
Midterm	30%
Final Exam	30%
Quiz Average	10%
Webwork	30%
More detailed information:	
Exams: All exams will be closed book, closed notes, with the exception that you may use a handwritten 3X5 card. Graphing calculators are not allowed on the exams. The final exam will be comprehensive but will emphasize material covered after the midterm. If you are forced to miss an exam contact the instructor as soon as possible.	Midterm
Quizzes: There will be a short (5-10 minute) quiz on recent material almost every class. There will be no make-ups if you are not in class when the quiz is given.	

Homework and WebWork: For each section there is a set of recommended exercises from the text which will not be collected. Each week there is a WebWork assignment due Monday at 11:59 pm. You may redo most of the WebWork problems an unlimited number of times before the deadline. See the course website for more details on getting started with WebWork.

Resources: As the course moves along very quickly it is essential that you stay on top of your work. I encourage you to discuss problems with your classmates, but you should work out and write up the WebWork solutions on your own. Two important resources:

- Calc Help Desk: Cornerstone Tech Lab.
- FSAP Math 130S tutor.
