City, Zip code

Dear Hiring Committee,

My name is Wanlin Li. I am currently a CRM-ISM postdoc fellow at the Centre de Recherches Mathématiques. I received my Ph.D from University of Wisconsin-Madison in August 2019 under the supervision of Jordan Ellenberg. I am applying for the tenure-track position in mathematics in your department.

My research focuses on number theory and arithmetic geometry, in particular the study of Galois action, rational points and algebraic cycles on varieties using tools from algebraic geometry, tropical geometry and topology.

I have included as my application the standard AMS cover sheet, a current copy of my curriculum vitae, a publication list, a diversity statement, a research statement and a teaching statement. Additionally, I have research letters from PhD advisor, postdoc mentor and collaborator as well as a teaching letter from a course coordinator.

I would be happy to provide any further information you require. If given the opportunity, I would be thrilled to be a part of your department.

Thank you for your consideration,
Wanlin Li
